

Facility Management

Österreichische Lotterien AG

aX Challenge

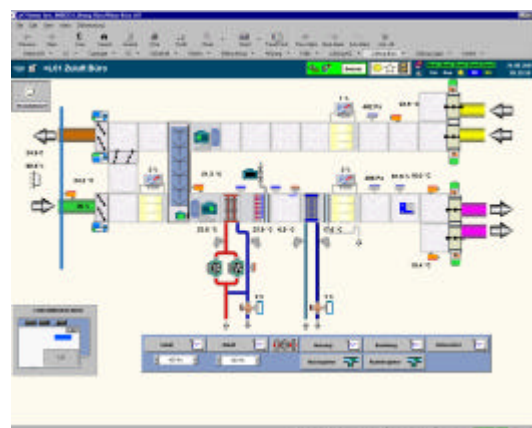

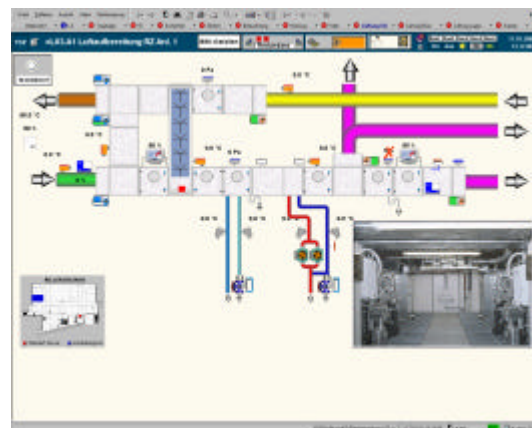

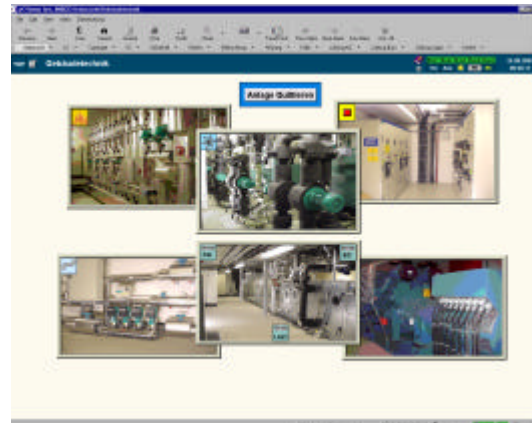

automationX provides an innovative facility management system for two buildings that comprise modern computer centres, spacious offices and a huge warehouse. The aX system covers the control system, the electronic control and plant control for safety engineering. Thanks to efficient system integration, errors can be debugged quickly by remote control.

aX Highlights:

- Entire control system: light, heating, and air conditioning, monitoring the electrical system
- The system can be operated locally or by remote control
- Complete integration of the plant in a “super” ordinate facility management system
- Data provision for energy management and engineering systems.

aX Plant Profile

- 4,000 I/O, about 1,000 per transceiver to other systems
- Redundant servers handle operations and

automationX Software for Industrial Automation GmbH, Teslastr. 8; A-8074 Grambach bei Graz; Tel: ++43-316-4000-300, Fax: ++43-316-4000-39; automationX@automationX.com

automationX Deutschland GmbH, Steinbeisstr. 41-43, D-71655 Vaihingen / Enz; Tel: ++49-7042-959 480, Fax: ++49-7042-910 255; sales.de@automationX.com

- data management with 3 client terminals
- Remote control by notebook (via GSM)

aX Scope of Supply

- Complete control system including visualization and data acquisition
- Overall facility management, portfolio management and integrated resource management (energy, staff, media)
