

LOOKING FOR YOUR DREAM JOB?

Automation Technician with Process Optimization Focus

We value your skills and will provide you with the opportunity to develop them. Whether you are an experienced programmer or dropped out of school, we have the right job for you. Quick entry into an attractive and innovative work environment and a variety of tasks and responsibilities in a good team are guaranteed.

Minimum annual gross salary according to the metal industry collective agreement: € 39,200

A higher salary is possible depending on your qualifications and prior experience.

Place of employment: Graz (A)

Your responsibilities:

We optimize process plants and are looking for an employee to strengthen our optimization team. Our customers know to turn to us for model-based predictive control systems. We also deal with process simulation and production optimization (focus: optimized planning).

Your qualifications and skills:

- High-level language programming skills, e.g., C#
- Digital technology skills
- Interest in math problems (statistics, numerical mathematics, linear algebra)
- Automatic control engineering
- Model formation and optimization
- HTL/FH/TU education

We look forward to receiving your application for one of our job openings at:
